PROFILE

Tech enthusiast seeking an entry-level position to kickstart my career. I wish to work in a dynamic organisation where I can contribute to the company's daily operations through my computer skills, adaptability, and problem-solving abilities

SKILLS

Computer & Technical

- **Windows and Linux** - installation, usage, applications, navigation and troubleshooting.
- **Cloud & Hosting:** Basic VPS usage, SSH access, configuration, navigation, troubleshooting and logs. Familiar with cPanel, Docker, Nginx, WordPress, Elementor, Wix Cloudflare, AWS, Oracle, Hostinger basics, and other online deployment platforms and their tools
- **Domain, DNS & Networking Basics** - DNS, Nameservers, A/CName records, SSL, Cloudflare, ports, firewall and other security basics
- **Internet, Digital & Operations** - Managing online tools, computer-based daily operations. Comfortable adapting to new tools/workflows through self-learning
- **Technical Support** - Interested in technical support, troubleshooting and problem solving. Comfortable learning new tools, systems and workflows

General

- Good English reading and written communication
- Basic familiarity with Word, Excel (adaptable to your specific workflows)
- Email and online platform handling
- Understanding of how to connect to APIs and Comfortable using AI-assisted Python scripting to turn raw web data into organized, readable formats and automation workflows using Python, SH and others.
- Comfortable using internet tools and online platforms
- Research & Diligence: Highly skilled at using documentation, online forums, and AI tools to analyze a problem and learn the steps before touching a system.
- Operational Accountability: Approach every task with a clear understanding of outcomes and safety, ensuring no steps are taken blindly.

PRACTICAL EXPERIENCE

Self-Learning, Independent Work & Projects

2021 – Present

- Used Linux distributions such as Ubuntu and Arch Linux for daily usage and experimentation.
- Worked with online hosting/VPS (Hostinger, Oracle, AWS, Heroku) platforms and basic deployment workflows using guides
- Used Telegram bot repositories and deployment methods on cloud/VPS platforms for learning and community usage.
- Performed Windows/Linux (any distro) installation/dual boot, troubleshooting, software setup, and device maintenance for personal use.
- Created small utility scripts and automation tasks with Python using AI when required.
- Learned technical concepts independently through forums, documentation, YouTube, GitHub, and experimentation

EDUCATION

- Bachelor of Science (B.Sc.) – Botany Major -2023
Gov. Lal bahadur shastri Sironj, Vidisha, Madhya Pradesh, India

LANGUAGES

- Hindi (Fluent)
 - English (written and understanding)
-
